**Date:** 18. 10 2024

**Ex. No.:** 1

## Calculate Area and Perimeter

**Write an Algorithm and draw a Flowchart to Calculate the area and perimeter of a square.**

**Algorithm:**

Step 1: start

Step 2: Let a be the side of the square

Step 3: $A = a^2$

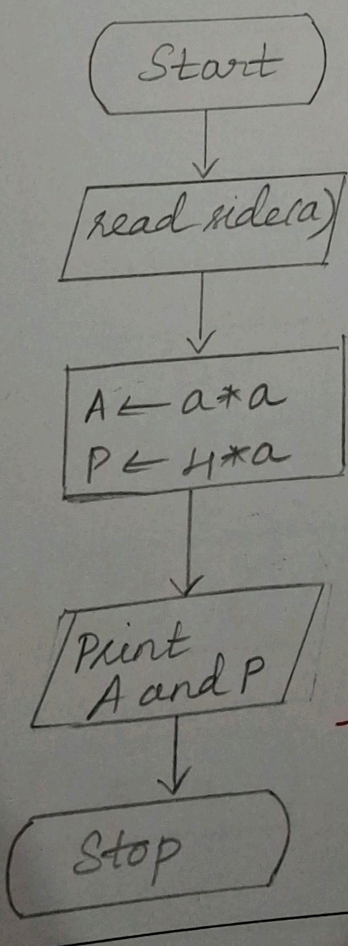
Step 4: print A as the area of the square.

Step 5: 4*a is the perimeter P=4*a

Step 6: print P as the perimeter of square

Step 7: stop

**Flowchart:**



Date: 18.10.24

Ex. No.: 2

## Days to Year Conversion

**Write an Algorithm and draw a Flowchart to convert the given days into years & months.**

**Algorithm:**

Step 1: start

Step 2: let n be the no. of days

Step 3: $n/365 = Y$ obtain its quotient

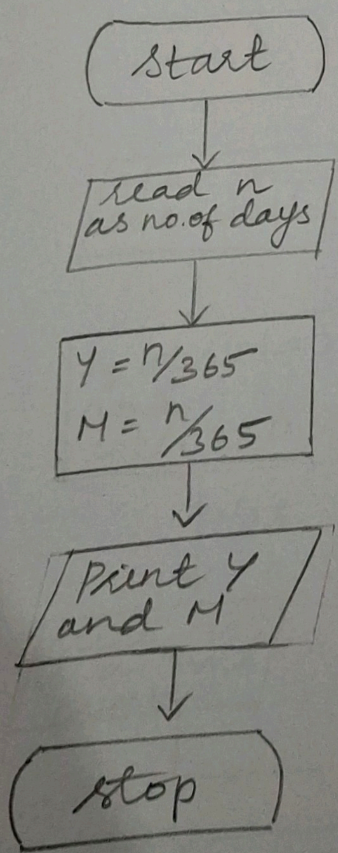
Step 4: print Y as the no. of Years.

Step 5: $M = n/365$ obtain its remainder

Step 6: Print M as the no. of months

Step 7: stop

**Flowchart:**



Date: 18.10.24

Ex. No.: 3

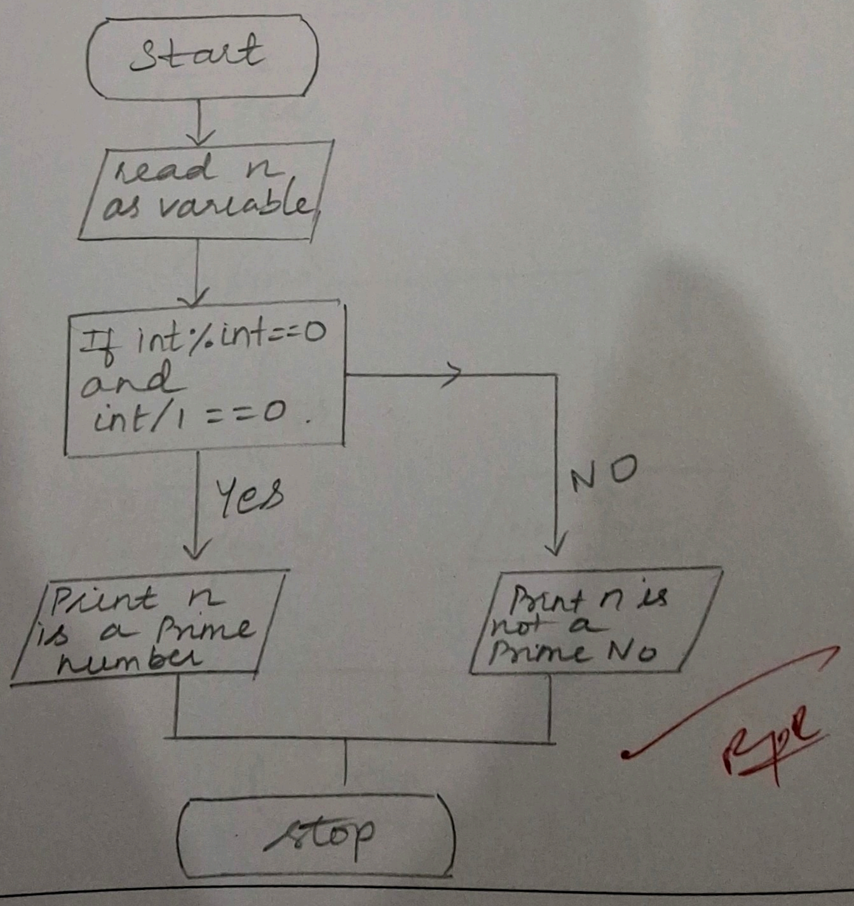
## Prime Number

**Write an Algorithm and draw a Flowchart to check whether the given number is Prime or not.**

**Algorithm:**

Step 1: Start
Step 2: Declare the variable as n
Step 3: get the input from the user
Step 4: Start the loop i from 1 to n-1
Step 5: if n is divided by i then print it is not a prime number
Step 6: if n is not divided by i then print it is a prime number
Step 7: stop.

**Flowchart:**



Date: 18.10.24

Ex. No.: 4

## Leap Year

**Write an Algorithm and draw a Flowchart to check whether the given year is Leap year or not.**

**Algorithm:**

Step 1: start

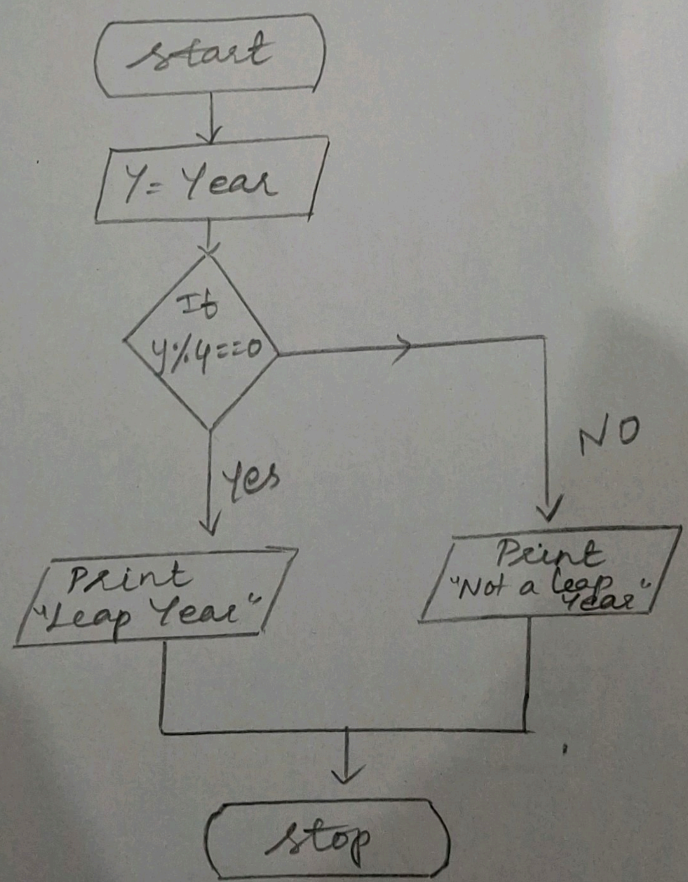
Step 2: let Y be Year as input

Step 3: If Y%4==0, then print leap Year

Step 4: else print not a leap year

Step 5: Stop

**Flowchart:**



Date: 18.10.24

Ex. No.: 5

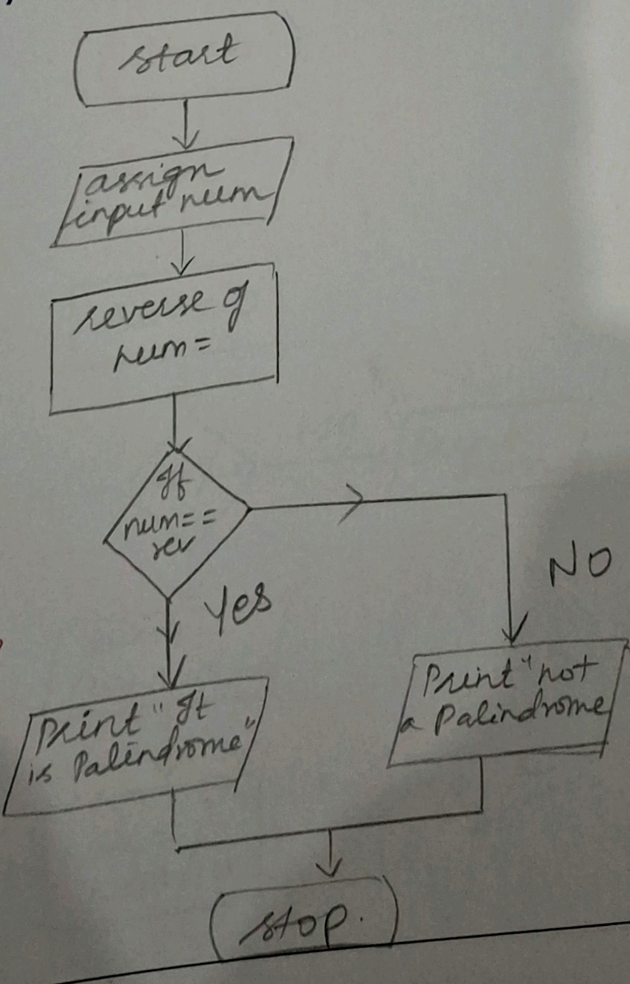
## Palindrome Number

Write an Algorithm and draw a Flowchart to check whether the given number is palindrome number or not.

**Algorithm:**

Step 1: start
Step 2: read the input from the user
Step 3: Assign a variable N; N≠0
Step 4: give any number more than one digit
Step 5: If the given number is equal to N when we reverse it then print it is a palindrome
Step 6: else Print not a palindrome
Step 7: Stop.

**Flowchart:**



KPR

Date: 18.10.24

Ex. No.: 6

## Sum of Digits

**Write an Algorithm and draw a Flowchart to calculate the sum of digits in the given number.**

**Algorithm:**

Step 1: start
Step 2: declare variable
Step 3: get the input from the user
Step 4: initialize sum = 0
Step 5: while loop with condition num > 0
Step 6: sum = sum + num % 10
Step 7: num = num/10
Step 8: print sum
Step 9: stop

**Flowchart:**
